

Cashier Training Guide

Detailed cashier guidebook with examples, screen-style pictures, what to input, what to avoid, and final checks before saving or submitting.

SHIFT 1

**4:00 AM - 1:00
PM**

SHIFT 2

**1:00 PM - 10:00
PM**

SHIFT 3

**10:00 PM - 4:00
AM**

WEBSITE

fueltechphil.vercel.ap

Training rule: Do not guess. If branch, date, shift, pump number, product, price, or deposit coverage looks wrong, stop and ask before pressing confirm.

1. Cashier Job Summary

YOUR JOB**Record the shift**

Pump readings, tank readings, deductions, PO/PR, oil, Coke, then submit.

YOUR LINK**/cashier**

Use cashier login only. Do not use manager/admin login.

FINAL ACTION**Confirm Report**

Submit only when every number is checked.

1. Login

Pick branch and enter cashier PIN.

2. Check

Branch, date, shift, cashier name.

3. Input

Pumps, tank, deductions, oil, Coke.

4. Review

Fix warnings before confirming.

5. Submit

Confirm report and wait for saved online.

Gray box

Read-only. Do not type here.

White/blue input

Type the number from your record.

Green button

Save or confirm after checking.

Yellow/red warning

Stop and fix before submitting.

Cashier boundary: Cashier records the shift. Cashier does not change fuel prices, approve deposits, verify banks, or use manager/admin access.

2. Login And First Screen Check

1

Open cashier page

Open <https://fueltechphil.vercel.app/cashier>, choose the correct branch, enter cashier PIN, then press **Proceed**.

Cashier Branch AccessLogin

SELECTED BRANCH
Liloan

CASHIER PIN

Proceed

2

Check branch, date, shift, and status

Do this before typing anything. If the report date or shift is wrong, do not continue.

Report InformationCheck first

BRANCH
Liloan

REPORT DATE
2026-07-09

ACTIVE SHIFT
Shift 1 - 4 AM to 1 PM

REPORT STATUS
Draft

3

Enter cashier name

Use the real cashier/teller name. This is used for checking who submitted the shift.

If the page opens on the wrong branch or wrong shift: stop first. Do not type pump readings into the wrong report. Ask manager/admin before continuing.

3. If First Opening Setup Appears

First Opening Setup appears only when the system has no previous confirmed readings. This is the starting point of the station. Enter opening numbers carefully because future shifts depend on them.

First Opening Setup

Only when starting from zero

PUMP	NOZZLE	FIRST OPENING PUMP READING	WHERE TO GET IT
Pump 1	Premium	408967.16	Copy exact register number from pump
Pump 1	Regular	325929.76	Copy exact register number from pump
Pump 1	Diesel	212631.95	Copy exact register number from pump

**UNDERGROUND TANK
OPENING**
Tank inventory in liters

COKE BEGINNING
Starting Coke count

**Confirm First
Opening**

Do

- Copy the exact opening pump register.
- Use decimals when shown, like **408967.16**.
- Confirm only when all pumps/tanks are correct.

Do Not

- Do not guess opening numbers.
- Do not switch Premium, Regular, Diesel.
- Do not put tank dip numbers into pump readings.

4. Official Pump Reading Register

This is the main sales source. The system computes liters sold from pump register readings.

Official Pump Reading Register

Most important cashier section

PUMP	NOZZLE	PREVIOUS SHIFT CLOSING	CURRENT CLOSING	LITERS SOLD
Pump 1	Premium	408967.16	409019.92	52.76 L
Pump 1	Regular	325929.76	326030.05	100.29 L
Pump 1	Diesel	212631.95	212631.95	0 L

BEFORE NUMBER

Previous Shift Closing

Gray/read-only. This is the last confirmed ending register from the previous shift.

AFTER NUMBER

Current Closing

Type the ending register reading for this shift. This is the number from the pump now.

Cashier does not need to calculate liters. Just copy the gray Previous Shift Closing, type the correct Current Closing from the pump register, and let the system calculate Liters Sold automatically.

No gasoline / closed station: If there were no sales, type the same number in Current Closing as Previous Shift Closing. Example: before 1000, after 1000 = 0 L. This is allowed.

Never type lower than previous closing. Example: before 1000, after 990 is wrong because it creates negative liters.

5. Product And Pump Rules

CHECK	CORRECT	WRONG
Product	Premium reading goes to Premium row	Putting Premium reading in Regular row
Pump number	Pump 1 reading goes to Pump 1 row	Typing Pump 2 reading in Pump 1 row
Decimals	Type 409019.92 if pump shows decimals	Typing 409019 or 40901992 by mistake
Zero sales	Same previous/current number	Leaving it blank when no sales

Decimal rule: Type decimals exactly as shown on the pump. If the pump shows **409019.92**, type **409019.92**. Do not remove the decimal point.

6. If Fuel Price Changes During Shift

The manager handles the price-change entry in the manager page. The cashier's job is to help record the pump register reading at the exact time the price changed.

SITUATION	CASHIER SHOULD DO	CASHIER SHOULD NOT DO
Fuel price changes during the shift	Write down the exact time and pump register reading for each affected product/nozzle	Do not change the manager price in the app
Manager asks for price-change reading	Give the pump reading at the price-change time, not the final closing reading	Do not guess the reading later
No price change during shift	Do nothing in this area; continue normal current closing entry	Do not invent a price-change entry

Example: If Regular price changed at 1:30 PM, cashier should record the Regular pump register reading at 1:30 PM. The manager uses that reading to split sales before and after the new price.

7. Underground Tank

The underground tank is a reference check. Official fuel sales come from pump readings. The tank section helps detect inventory differences.

Underground Tank

Inventory reference

FIELD	WHAT TO INPUT	EXAMPLE	NOTES
Previous Shift Dip	Read-only	3500 L	Comes from last shift
Delivery	Liters delivered into tank	2000	Only if delivery happened
Pull-Out	Liters removed from tank	0	Only if pull-out happened
Calibration	Liters used for calibration and returned	10	Reduces official sales but not tank inventory
Current Actual Dip	Actual dip at shift end	6190	Copy from dip measurement

8. Deductions, FuelTech Pay, PO/PR

FuelTech Pay Total

Enter the total non-cash payment amount together: card, GCash, Paymaya, and similar payments.

Points Withdrawn

This is based on Cash Redemption + Fuel Redemption. Do not manually invent this number if shown as read-only.

SECTION	WHAT CASHIER ENTERS	WHAT NOT TO DO
Deductions	FuelTech Pay Total and valid deduction amounts	Do not put bank deposit here
PO Accounts	Account/customer name and amount	Do not duplicate the same PO
Purchase Requests	Particular/item and amount	Do not enter unapproved expenses
Oil Sales	Total oil sales amount	Do not mix oil with fuel sales
Coke Ending	Ending Coke count	Do not edit Coke Beginning

Cash redemption / fuel redemption

Enter redemption only in the correct redemption fields if they appear in the app. Points Withdrawn is based on these redemptions.

Bank deposit is not cashier input

Do not put bank deposit amount in deductions, PO, PR, or FuelTech Pay. Manager handles bank deposits.

End-of-Shift Cash Count

Physical counted cash

END-OF-SHIFT CASH COUNT

Cashier types physical cash counted

EXPECTED CASH ON HAND

System calculated

ACTUAL CASH COUNTED

Cashier count

ACTUAL CASH DIFFERENCE

Actual minus expected

Important: End-of-Shift Cash Count does not replace expected cash and does not replace bank deposit. It only checks physical counted cash against the system expected cash on hand.

9. Request Date Correction

Use this if the cashier needs to correct a past date or shift. It opens only after admin approval.

1 Select correct report date and shift

Choose the old date/shift that needs correction.

2 Type reason

Example: "Wrong Regular reading typed in Shift 2."

3 Press Send Request to Admin

Wait for admin approval before editing that report.

Do not use correction request to skip today's report. It is only for fixing a real wrong date/shift after admin approval.

10. Submit Report And Missing Report Warning

Confirm Report Popup

Final check

- Check branch and shift.
- Check total liters.
- If unsure, press **Go Back**.
- If correct, press **Confirm Report**.

Go Back

Confirm Report

Submitted means sent to admin. Do not confirm if the report is not complete.

After confirming: Keep the page open until the app says it is saved online. Do not close the browser immediately after pressing Confirm Report.

Missing Previous Shift Warning

What cashier may see

Previous shift is missing.

Please complete **2026-06-29 - Shift 3** first so pump readings stay correct.

MISSING REPORT

June 29, 2026 - Shift 3

This is the exact report that must be completed first.

CURRENT REPORT WAITING

June 30, 2026 - Shift 1

Do not continue this one until the missing shift is submitted.

Go to Missing Shift

After Pressing Go to Missing Shift

What to input

BRANCH
Liloan

REPORT DATE
2026-06-29

ACTIVE SHIFT
Shift 3

STATUS
Draft

WHAT CASHIER SEES	WHAT CASHIER INPUTS	REMINDER
Previous Shift Closing	Current Closing from missing shift paper/register	Do not type today's reading here.
Correct missing date and shift	Cashier name, pump readings, underground tank, deductions, oil, Coke	Use the records for that missing shift only.
Confirm Report popup	Press Confirm Report only after checking everything	Then continue the next shift/report.

Important: The Go to Missing Shift button is not for changing any random report. It opens the specific missing shift needed so the next pump beginning numbers stay correct.

11. Troubleshooting

WARNING/PROBLEM	MEANING	CASHIER ACTION
Previous shift is missing	The shift before this was not submitted	Press Go to Missing Shift and complete it first
Opening is missing	No previous reading to compare	Complete first opening or missing previous report
Closing lower than opening	Negative liters	Check typed number, pump, and product
Pump price missing	There are sold liters but no price	Tell manager to enter fuel price
Not saved online yet	Data is still syncing	Keep page open until saved online
Submitted button already green	This report may already be submitted	Do not submit again unless admin instructed you
Number looks too high	Pump, product, or decimal may be wrong	Compare with paper/register before confirming

12. Final Cashier Checklist

- Correct branch
- Correct date
- Correct shift
- Cashier name filled
- Pump readings copied exactly
- Premium/Regular/Diesel not switched
- Decimals included
- Tank dip entered
- Delivery entered if any
- Calibration entered if any
- FuelTech Pay entered
- PO/PR entered if any
- Oil sales entered if any
- Coke ending entered
- End-of-shift cash counted
- Warnings fixed
- Confirm popup checked
- Page kept open until saved online

Sticker Reminders - Cashier

Before Typing

- Check branch.
- Check date.
- Check shift.
- Enter cashier name.

Pump Rule

- Gray = previous closing.
- White input = current closing.
- Current must not be lower.

Cash Count

- Count physical cash.
- Type end-of-shift cash count.
- It does not replace bank deposit.

Submit

- Read popup.
- If unsure, Go Back.
- Confirm only when finished.
